

ACTIVIDAD LÚDICA: DESCUBRE EL MISTERIO

Hoy vamos a sacar nuestros lápices de colores y descubrir qué se esconde tras los números.

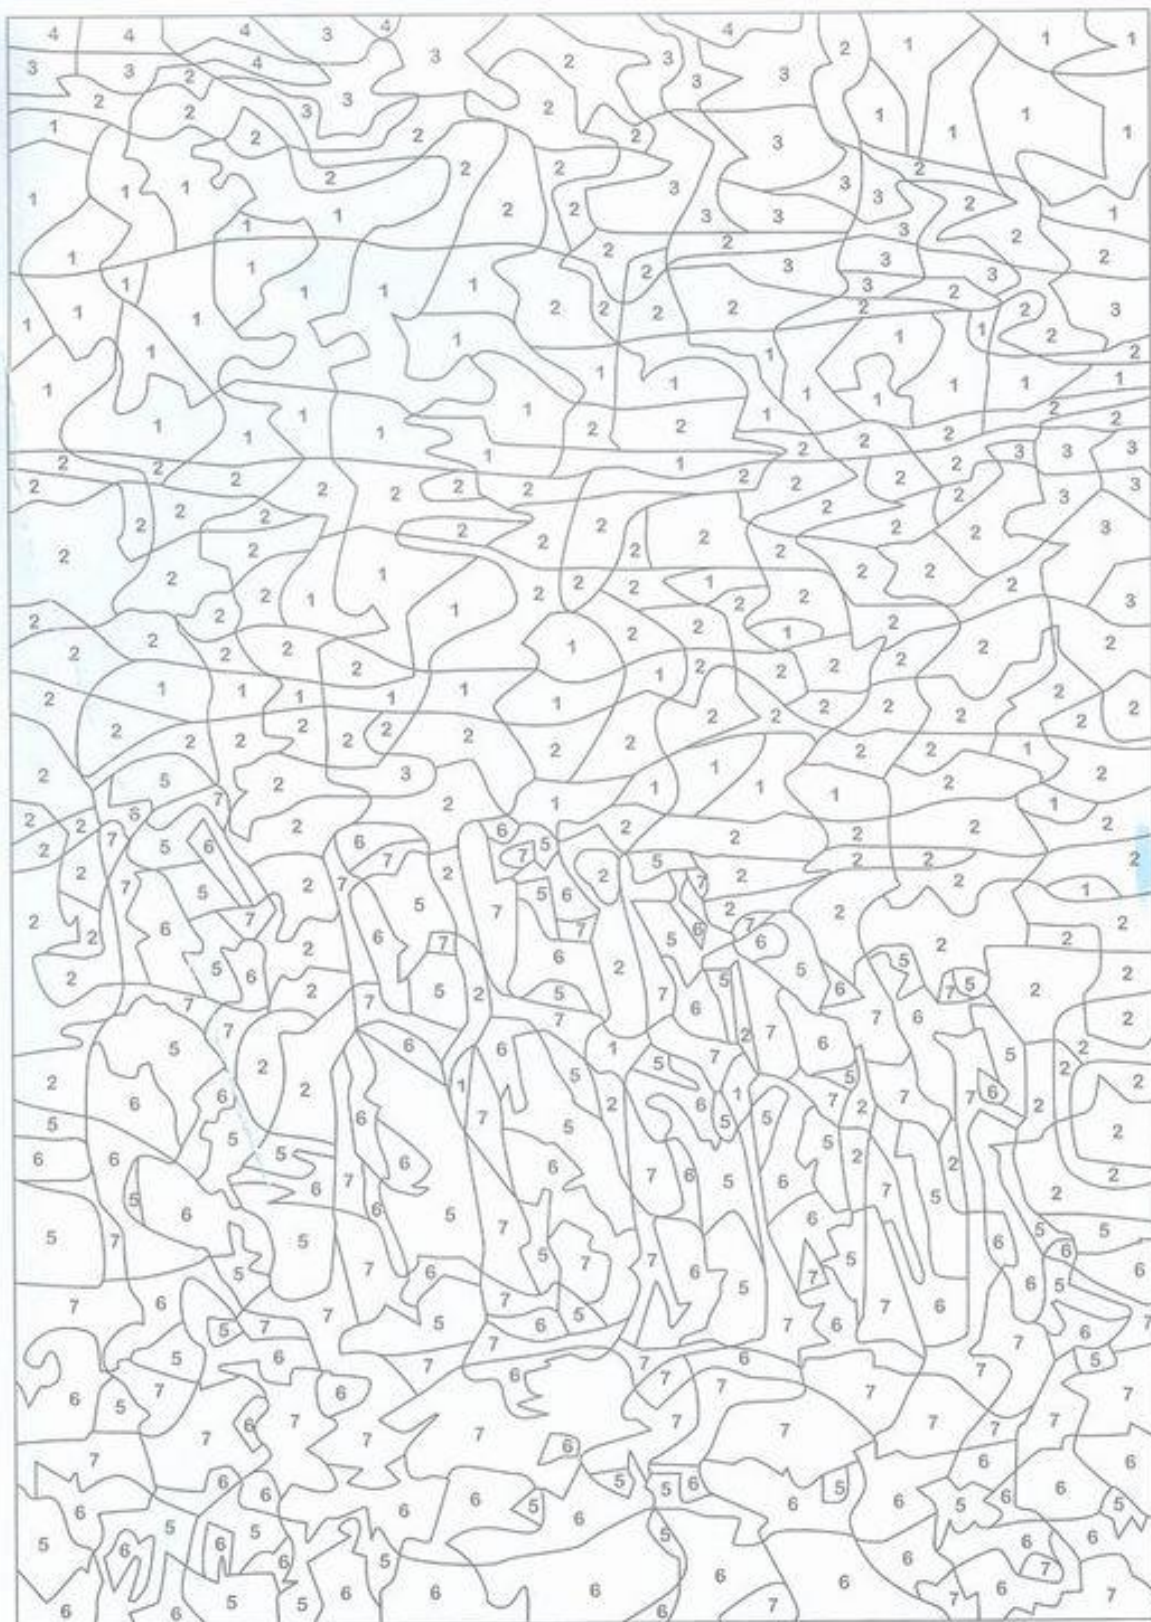

The figure displays a 20x20 grid of numbers from 1 to 7, representing a 7-color palette. The colors are defined as follows:

- 1: gris (grey)
- 2: rouge (red)
- 3: noir (black)
- 4: orange
- 5: rose (pink)
- 6: grenat (maroon)
- 7: bleu (blue)

The grid is composed of 20 rows and 20 columns. The numbers are distributed across the grid, with some numbers appearing more frequently than others. For example, the number 1 (gris) is the most common, appearing in many cells, while the number 3 (noir) is the least common, appearing only in a few cells. The distribution of numbers is not uniform, with some rows and columns containing more of a particular color than others.
